Work Assignment No. 707
Final Report
Potentially Responsible Party Search
Albion Sheridan Township Landfill

Dear Nancy:

Enclosed you will find seven copies of the Final Albion-Sheridan Township Landfill Potentially Responsible Party Search Report. This report has been revised to incorporate the comments communicated to Tetra Tech in your 26 July letter, written notes sent to us in late August (no date) and our telephone conversations. While you will recognize many of the revisions, I have detailed them as follows:

- the extra "of" on page 4 of the draft report has been omitted
- PRP names/subject headings have been typed in bold type, and a new table listing all PRPs has been added
- page 49, paragraph 2 of the draft report has been revised to clarify the source of the information, and the relationship between "Sheffield" and the city
- we have attached the U.S. EPA Site Inspection Report for the Albion-Sheridan Township Landfill (provided to Tetra Tech by the U.S. EPA) to the report as Appendix F

Page Two

- the source of all reference documentation has been clarified both in the report text, and in the cover pages for each appendix
- all companies identified by Arlow Wilkinson as having disposed of wastes at the landfill have been included in the PRP section of the report
- the text of the report has been amended to explain that corporate reports have been included in the reference package for companies that were initially of interest, but were later found to not be associated with the landfill
- the two entries for Union Steel Products on the State of Michigan generators/transporters list are for the same company. This has been explained in the PRP section
- the PRP listing for Nelson Chemical has been amended to state that not only is there no telephone listing for the company, but there is no corporate annual report on file with the State of Michigan for Nelson Chemical
- City Disposal Systems, a subsidiary of City Management, does appear to be the "City Disposal" cited by Arlow Wilkinson. This company has been added to the PRP list
- we did not pursue the names of the three factories mentioned in the February 1966 memorandum from Fred B. Kellow (PC 5-1), as the PRP list includes all the currently operating factories in the Albion area that were recognized by Arlow Wilkinson
- M & R Services and Michigan Waste Systems (Waste Management) have been added to the PRP list
- Tetra Tech received confirmation from the State of Michigan of the error made in the state tax deed for parcel 13-19-362-036-00. This has been added to the reference package (A 30-1), and has also been cited in the text

Page Three

- we were not able to include the name of the Albion City Manager in the PRP list or report text, as the city is currently looking for a new manager

If you have any questions or concerns regarding the Final Albion-Sheridan Township Landfill Potentially Responsible Party Search Report, or the work assignment in general, please call me at (206) 822-9596.

Sincerely,

Greg Bawden
